Lab Data Tables

LtDerivedValueView

```

dbo.LtDerivedValueView
Columns
  ValueName (nvarchar(50), not null)
  ValueId (int, not null)
  UnitName (varchar(50), not null)
  TriggerValueName (nvarchar(50), not null)
  TriggerValueId (int, not null)
  TriggerUnitName (varchar(50), not null)
  Callback (varchar(250), not null)
  ResultItemId (varchar(100), null)
  ResultWriteLocationId (int, null)
  SampleTimeTolerance (int, null)
  NewSampleWaitTime (int, null)
  TriggerRawValue (float, null)
  TriggerSampleTime (datetime, null)
  
```

This handles the generic case of a selector, which may not get used much during migration
